TEST COMMENTS: Cool, wet weather through June delayed planting and hampered early season growth. Rains slowed after July 15th, and the hot, humid conditions of late July led to very dry weather through harvest. A killing frost occurred on Sept 15th, hurting full season beans the most. Brian noted that top nodes have only one pod this year, vs. a cluster in the past. Lat: N44.02348, Long: W-92.72378
